

THE SLUM BY THE DRAIN

CHUNG UK TSUEN #7

We walked by this metal sheet compound several times always suspecting that it might lodge refugees. But we had no contact. Last week a mother with baby visited our office from this ghetto.

She complained about the hard conditions endured for eight months with no welfare for her baby turned away by ISS-HK despite having a UNHCR refugee claim. How did that happen?

10 refugees live in this slum. They are charged 1600\$ for tiny rooms and denied utility assistance by ISS-HK. The Slum Lady subdivided with plywood every open space for maximum profit.
