

THE SLUM IN THE CONTAINERS

YUEN LONG #8

There isn't one legal structure, rural, residential or commercial. Down Long Ping Road, shipping containers are stacked into a cluster that ISS accepted and approved to settle refugees.

15 refugees are segregated into a tight, unsanitary site. These 'rooms' are half a 40' container with poor, inadequate facilities. No surprise that toilets don't flush and rain floods the camp!

Refugees cannot afford basic homes. ISS has schemed for years with unscrupulous Slum Lords to establish ghettos in animal farms, rusty huts, warehouses and even ... containers!

SAFEGUARDING REFUGEE RIGHTS

A photograph of a shipping container. The container is light-colored with dark markings. The letters 'OCLU' are painted in large, bold, black letters. Below them, a white rectangular label has the letters 'GBX' in black. An air conditioner is mounted on the container, with its condenser coils visible. A black cable is coiled around the air conditioner. A yellow corrugated pipe runs vertically along the container. The background shows a blue sky and some other structures.

“OCLU”
a prefix for
Maersk Line
containers
