

# THE SLUM IN THE VILLAGE HUTS

## KAM TIN #1

In the old section of Kam Tin village are several shacks that house refugee families. This location might be zoned for human habitation with connections by power companies.

These refugee families have lived here years and made many home improvements to upgrade dilapidated shacks spending money that is hard to collect when banned from employment.

These huts are not a great concern as local residents live in similar nearby structures. However, refugees struggle to pay rent balances over what is provided in assistance by ISS.
