

# THE SLUM UNDER CONSTRUCTION

## CHUNG UK TSUEN #6

A refugee ghetto is under construction behind a high metal perimeter. After this site was destroyed by a typhoon in September, the slum lord decided to expand his business.

He has hired refugees to do the work. This slum used to house ten refugees – courtesy of ISS-HK – but could settle double that number if the authorities continue to turn a blind eye.

What was destroyed first by a fire and then by a storm, is being developed into a ghetto that will take advantage of the 1500\$ rent increase.  $20 \text{ refugees} \times 1500\$ = 30,000\$$  a month.
